SRGH IVF CRYO BANK — CLIENT HANDOFF DOCUMENTATION SUMMARY

Project Name: SRGH IVF Cryo Bank Storage & Record Management System
Client: SRGH IVF Cryo Bank & Storage Clinic
Lead Developer & Service Provider: Aditya Kumar
Project Delivery Date: September 30, 2026
Testing & Evaluation Period: October 01, 2026 – October 31, 2026 (Free clinic trial)
Paid Maintenance Effective Date: November 01, 2026 (Fee received 2nd Dec 2026)
Document Status: Final Handoff Package

---

1. Executive Summary

This handoff package contains all technical, operational, credential, and legal/commercial documentation for the **SRGH IVF Cryo Bank Storage & Record Management System**.

The platform provides an end-to-end, high-security cryopreservation record system designed specifically for IVF clinics to track embryos, oocytes, and sperm straws stored across cryo cans and Viso Tubes. It eliminates physical record loss risk through dual-layer access verification, dual-engine AI OCR scanning, real-time 3D storage matrix visualization, thaw workflow management, and audit log compliance.

---

2. Live System Access & URLs

Environment	URL / Endpoint	Purpose
Web Application (Frontend)	https://www.sgrhivfcryo.in/	Primary Clinic Portal for Staff & Admins
REST API Server (Backend)	https://api.sgrhivfcryo.in	Secure NestJS API Server & Webhooks
Local Development API	`http://localhost:4000`	Local development REST endpoints
Local Development Frontend	`http://localhost:3000`	Vite Development Server

---

3. Included Documentation Files

All handoff documents are located in this directory (`CLIENT_HANDOFF_DOCS/`):

File Name	Target Audience	Description
CREDENTIALS_AND_ACCESS.md	Client / IT Admin	Complete credentials list: Server SSH, Database, Layer 1 & 2 Auth, SMTP Email, AI API Keys.
DEVELOPER_HANDOFF_GUIDE.md	Software Engineers	Technical stack overview, codebase architecture, setup

		guide, DB schemas, deployment & PM2 commands.
MONTHLY_MANAGEMENT_AGREEMENT.md	Client Management / Finance	Commercial terms & conditions for the **₹5,000/month** maintenance & SLA management contract (Starts 1st Nov 2026, Fee received 2nd Dec 2026).
USER_MANUAL_CLINIC_STAFF.md	Doctors / Embryologists	End-user operational manual covering Patient Entry, Straw Allocation, OCR, Thawing, and Mobile App Installation.

---

4. Key Functional System Highlights

1. **Dual-Layer Security Access Control**:
   - **Layer 1 Gate**: Site Access Key (ivf@sgrm / `clinic2026`) protecting clinic system entrance with 7-day auto-session persistence.
   - **Layer 2 Staff Authentication**: Role-based access (ADMIN vs. STAFF) enforcing strong bcrypt/argon2 password authentication (`ADMIN` / `IVFadmin`).
2. **Cryo Storage Matrix Visualizer**:
   - Manages physical Cans (Can 01 to Can 16), Viso Tubes (01 to 08 per Can), and Straw slots (Max 2 embryos/oocytes per straw).
   - Real-time color-coded storage capacity heatmaps (0% to 100% occupancy visual feedback).
3. **Dual-Engine OCR & AI Medical Record Extractor**:
   - Integrates Google Cloud Vision OCR + Gemini AI to parse handwritten & printed clinic physical consent forms into structured digital patient profiles.
4. **Thaw & Release Workflow**:
   - Safe embryo thawing verification procedure with mandatory embryologist authorization and audit logging.
5. **Mobile PWA App Installation**:
   - Integrated mobile app installation prompt supporting iOS Safari (Add to Home Screen) and Android Chrome (1-click app install).

---

5. Next Steps for Client

1. Review and store CREDENTIALS_AND_ACCESS.md in a secure password vault (e.g., 1Password / Bitwarden).
2. Review and sign the MONTHLY_MANAGEMENT_AGREEMENT.md for ongoing server upkeep & SLA management.
3. Provide USER_MANUAL_CLINIC_STAFF.md to clinic embryologists for operational training.
